

SCOTT COUNTY KICKER.
Published every Saturday by
WORKERS PRINTING COMPANY.
Directors—P. E. Daugherty, E. C. Bowman, Henry Roth, Sol Diebold, Phil A. Hafner.
Subscription, one dollar a year. Six months, 50c. 3 months, 25c. Phil A. Hafner, Editor.

STRIKE SITUATION.
The Kicker had hoped to be able to tell its readers something definite concerning the threatened strike of four hundred thousand railway employees on 225 railway systems, but so far it hangs like the European war—unsettled with both sides firm.

Last week was spent in New York by the representatives of the railroads and the representatives of the four brotherhoods.

The railway managers insist that they want arbitration. The employees insist that arbitration is a shell game by which they have been gold-bricked too often now, and refuse to have anything to do with it. The railway employees might as well submit their differences to a railroad owned court as to a railroad owned arbitration board.

After fooling away a week, both sides gave up hope of a settlement Friday. Then President Wilson notified both sides that he wanted to be heard. So all went to Washington Saturday night to listen to what the president had to say. And there they are at the time the Kicker goes to press.

In the freight service the strike was to begin at noon Sunday, but it seems that the managers are playing for delay.

FARM NOTES.
CLOVER AS A GREEN MANURE.
By H. B. Derr.

I notice quite a number of farmers plowing under the second crop of clover for green manure. Where the soil is deficient in organic matter and plant food the increased return from the wheat crop will be much greater than if the crop was plowed for seed.

There is another benefit and that is there will be less trashy clover seed sown. A number of our clover seeds are badly infested with ticks, white top and other and passing them under will be exterminating those seeds that are not mature. For this reason early plowing is best. Late plowing while turning under the seed does not exterminate them as they lay dormant in the ground for several years and under proper conditions germinate and produce weeds.

A ton of clover contains an amount of nitrogen equal to that in four tons of barnyard manure. At present prices this amount of nitrogen is worth 7 to 8 dollars. By plowing it under this nitrogen is added to the soil. On run black soil this amount of nitrogen may cause the wheat to rot and produce stunted crops. Consequently on the above type of soil the second crop had better be removed. If the second crop is plowed under the seed will go a long way in insuring a good stand of clover. In addition to the nitrogen contained in a ton of clover may the organic matter equivalent of about 3 1/2 tons of ordinary barnyard manure. Organic matter is easily leached off our sandy lands, and much of our range soil would be benefited by its use.

WORM REMEDY FOR HOGS.
Numerous requests are coming in for a worm remedy, now that autumn is so high priced. The following remedy is recommended by the U. S. Bureau of Animal Industry.

Place in pens and do not feed nor water for 24 hours. Then give each pig the following dose: 2 to 3 months old, 35 drops of oil of American wormseed in one ounce of castor oil. From 3 months to 100 pounds weight, 50 to 100 drops of American wormseed in from 2 to 3 ounces of castor oil according to weight. Larger pigs one teaspoonful of oil of American wormseed in four ounces of castor oil. For best results dose each pig separately. It is dangerous to drown hogs; it is safer to throw them and give the medicine with a tablespoon. After dosing feed and water. Repeat the treatment in ten days.

REVIVAL MEETING.
At Vanduser, beginning September 3, by the congregation of the Church of God, and continued during the month. Large tabernacle. Rev. J. H. Ball of Arkansas will assist Mrs. H. A. Delany in the services. Everybody invited.

"Church Sends Men to Army" reads a newspaper headline. Probably for the purpose of enjoining the enemy the commandment "Thou shalt not kill."

HERE AND YONDER.

Fritz Bryant of Benton, and Clyde Fullerton and Lonnie Wilson, farmer boys living near town had quite a strenuous time Saturday night. Mrs. Ben Adams, wife of the rural route carrier, was away and Ben was spending the night with his parents. Ben has a car and these boys thought it a good time to take a ride. So they took Ben's car out. Mrs. Wm. Rustig, who lives near heard them and gave the alarm. But the boys speeded away and were chased by Ben and Glenn Adams in Glenn's car. But the boys hit only the high places. They raced through Oram down by Morley and back to Benton, where they abandoned the car. Arrests followed and the boys were put under bond of \$100 each for their appearance here Saturday.

The people of Fornfelt had an exciting time Thursday afternoon in an effort to quench the fire that destroyed five residence buildings on the south side of the railroad. The fire is supposed to have originated from a defective fuse in the building occupied by R. L. Hughes—a six room house built when Fornfelt was first platted by Henry Schmette. The other buildings belonged to Mrs. Mabel Ringo, Arthur Keller, W. McMullin, J. H. Bryant and P. J. Devine. Fornfelt has neither water works nor fire-fighting equipment, and the bucket brigade soon found itself short on water. Most of the contents of the buildings were saved.

The way that Cornelius Roach was left at the post in the gubernatorial race indicates that the court house organs of the different counties are losing out among the people. In every county Roach had at least one paper boosting him. Where he divided his \$8000 constitutional amendments pie among two or more papers of a county two years ago, he had two or more papers supporting him. In all, he had over sixty thousand dollars of public money to hand out to papers "selected" by him all over the state. Yet he hardly backed the board. This seems to prove that the people are getting next to the kept organs.

If you take your relatives to the hospital and they die, that is the regulation way—if you can raise the money. If you left them at home to die you might be accused of neglect. But it seems to me that this going to the hospital and being operated on is getting mighty common. I would have more confidence in it if the hospitals were publicly owned and the service free. Too many people who are taken to the hospitals come back in a box.

Under date of August 5 Emil Schmett writes from Cottonwood, Idaho: "Farmers are busy cutting hay. Next week grain cutting will be in full blast. They are contracting barley at \$1.25 per 100 pounds and wheat at 90 cents per bushel at the warehouse here. Crops look good and I think the yield will be fair. We are having fine cool weather for the grain to ripen. Garden truck is plentiful."

Philip Westrich and son Dave, and John Westrich and Joe Westrich of New Hamburg parish, and Louis Hahn of Macdonald, were Kicker visitors Tuesday. Mr. Hahn said they had had no rain in his neighborhood since August 1, but the rain at that time saved the corn crop. Mr. Westrich is a carpenter and said he would build the next day building a two-story residence for Jos. Hahn near Bleda.

The child of Mr. and Mrs. Nathan Bremer near Maunden, was drowned in a kettle of soap suds. Mr. Bremer was at Maunden loading watermelons. Mrs. Bremer left the child on the porch eating melon. Presently she called and the child did not answer. A search revealed the feet of the child sticking out over the kettle. The mother hastily took it in her arms, but it was dead.

Bloomfield voted on a bond issue of \$5,000 to improve the streets—and lost. Bloomfield ought to import the harem of patriots we had in control here four years ago. They could carry anything—no matter what the taxpayers thought about it. If the taxpayers kicked, an inquisition attended to them.

An abandoned baby was found lying on a neat pad in the Cairo post office last week. A note pinned to it read: "This child is legitimate. Born 7-22-10. Financial conditions force this action. Mother." Because of poverty a mother is forced to give up her offspring. And they tell us this is prosperity.

The liquor question will be "hot" and worked just a little harder during the present campaign than formerly. The two old parties have platforms exactly alike, and the only difference in their presidential candidates is whiskers. And the liquor question is always sure of starting something.

Miss Margaret Tinsley received the Democratic nomination for county clerk of Pemiscot county. She had two opponents and received a majority over both. Good. The bone-heads are softening.
